Feature:	Pussy squirting from dildo.mpeg	0.14
Trailers:	Nil	
Total running time:		0.14

Excisions: No Excisions Recommended

Reasons for excisions:

Not Applicable

Summary of reasons for classification:

The computer moving image file entitled *Pussy squirting from dildo.mpeg* is classified as: Objectionable.

The publication is a short video clip. The clip explicitly depicts a man and woman involved in sexual conduct in which the woman expels fluid in a manner that a reasonable person is likely to assume is urination. A third woman observes the couple. This is the sole focus of the clip. Its most likely purpose is to sexually arouse and entertain viewers. In doing so, it promotes and supports the use of urine in association with sexual conduct.

The classification of this publication interferes with the freedom of expression, as set out in s14 of the New Zealand Bill of Rights Act 1990. This outcome is consistent, however, with Parliament's intention that publications that promote and support the use of urine in association with sexual conduct, thus falling under s3(2) of the Films, Videos, and Publications Classification Act 1993, are deemed to be objectionable.
